---

Dear Hiring Committee,

October 31, 2025

I am writing to express my interest in opportunities that allow me to combine my technical expertise, creativity, and passion for innovation. As an undergraduate student pursuing a B.S. in Computer Science and Data Science at Rutgers University, I have developed strong analytical, programming, and research skills that I am eager to apply in professional settings.

Throughout my academic and professional experiences, I have worked on projects that blend technology with real-world impact. As a Design Researcher Intern at IDEA Expeditions, I collaborated with scientists and engineers to transform complex data into actionable insights through interactive visualizations. Additionally, my experience at Blueprint and Break Through Tech AI strengthened my skills in user-centered design, machine learning, and cross-functional teamwork. These experiences have helped me grow as a problem solver who values both technical rigor and user empathy.

Beyond my coursework and internships, I enjoy exploring creative applications of technology, and I want to work in environments that encourage collaboration and innovation.

I would be excited to contribute my technical, analytical, and communication skills to future opportunities that promote growth and meaningful impact. Thank you for your time and consideration.

Sincerely,

Tiya Bordia
